

Item 17C

Hi Adele

Thanks so much for everyone's considerations and support , it's much appreciated .

Item 17C

This is where we are now , with one bay of a proposed 4 bays as we progress with volume .

Ian Burrows has been informed and I'll be finalising the delivery process / plan / access - egress methods and I'll keep you posted, so you have a script to refer to if questions are asked about how we (The TFAA) operate the Manure Compound.

It's possible we could be implementing a delivery as early as this weekend.

Thanks

Nick
