

Item 9d

What will happen next is Dad will come down with his team to do a more in-depth survey get up into the roof etc then we will start to implement the design.

Once we have this I will come and present to you again then once that's signed off, we move into detailed design which is a tender pack so you can tender out to build companies. If this includes submitting for planning etc it will too.

Also in between any public / wider team presentations etc we are more than happy to help and be there for.
