Details of Project: Trawden Man Shed is expanding its service to include modelling and crafting by taking additional space in the existing unit (50% of downstairs). This will cast a wider appeal to the residents of the parish and enable the work of the shed to be extended to new members. The downstairs space will be a dust free (and noise reduced) space conducive to a quieter, more peaceful area of the unit. Work has already started and we have been fortunate enough to have material funding from Jewsons (for the partitioning), City Electrical (lighting) and Trawden Forest Community Centre (electrical work for the lighting). This funding if forthcoming would be used to fund the build / buy of new workbenches in the space. There is a desire amongst the early modellers to re-create Trawden Village on a small scale and the mobile benches would be used to build models on.

How would this benefit the Trawden Parish? The existing shed would be able to continue its work of tackling social isolation to a wider audience. We have already seen the benefit that the existing space provides to its current 30+ members.

Furthermore, if a model village were to be created, we would propose opening it up for viewing during key village events thus promoting the village to visitors.

Timescale for the project: 6-12 months

Any funding from other sources? YES Jewson (c. £500 materials), CEF (c.£600 lighting), TFCC (£300 electrical work for lighting)

Please note that VAT will only be paid as part of the funding if organisations cannot reclaim VAT.
