

A and N Signs Quote

Hi Lesley,

Please find below information about the throwline stations we have supplied previous

The boards are constructed from aluminium at 1220mm x 915mm they have blind riveted channel to the rear for fitting. They come with 2 x black aluminium posts with clips and caps, the fascia is self adhesive vinyl with digital print graphics they have an anti graffiti over laminate film applied.

The throw lines are incased inside a galvanized powder coated box with locking mechanism, these are fixed from the front so the fixings can not be tampered with.

The line is an Ionic 25m x 10mm floating line with bag.

The lock is an Abus double bolted 4 number combination lock.

We can customise all the face to how you wish. We can get different colour posts and also have the rear of the signs powder coated to a different colour. (this will increase the price)

The prices and discounts have been as follows:- 1-10 £630.00 each 11-20 £615.00 each 21+ £600.00 each

Lead time will be around 3 weeks from order.

Delivery is a little tricky as they are quite a bulky item and depends on how many are ordered to be delivered by courier. It might be possible for us to drive them over so price will be dependent on postcode or if you have a van you use you can always collect yourself.

Hope this helps a little but if you need anything else please let me know.

Regards Andy
